Profile

Informatics and Computing Engineering student at FEUP specializing in frontend development, while actively expanding into full-stack and mobile ecosystems. Passionate about bridging the gap between aesthetics and functionality to build intuitive, high-performance applications, while continuously exploring modern frameworks and design principles.

Education

University of Porto, BSc in Informatics and Computing Engineering Sept 2023 – Jul 2026

- **Coursework:** Software Engineering, Computer Architecture, Databases, Design of Algorithms, Web Technologies, Computer Graphics, Artificial Intelligence

Experience

Capgemini Engineering, Software Engineer Intern Feb 2026 – Jul 2026

- Developed a full-stack health monitoring platform that creates a digital twin of a patient's cardiac health, with wearable data ingestion, AI-powered anomaly detection, and live metric broadcasting to a clinical dashboard for remote medical supervision.
- Tools used: React, TypeScript, Flutter, Python, FastAPI, PostgreSQL

FEUP, Software Engineering Teaching Assistant Feb 2026 – Jul 2026

- Helped Software Engineering students with questions about the subject theory and project.

NIAEFEUP, Member Oct 2025 – Present

- Collaborating on developing **uni**, a mobile application to help students discover and manage academic information in one place, and **TTS**, a platform where students can experiment with the possible combination of schedule options they can pick for the semester.

Projects

junto. 🔗 junto.

- Co-developed a full-stack social platform designed to bring people together through shared cultural interests. Implemented features including authentication, user management, social feed and interactions.
- Tools used: Laravel, JavaScript, Tailwind CSS, PostgreSQL, Docker

Personal Portfolio 🔗 portfolio

- Designed and built a high-performance interactive portfolio website featuring a modern brutalist aesthetic, centralized data architecture, and smooth animations.
- Tools used: React, TypeScript, Tailwind CSS, GSAP

Volunteering

Mentoria UP Sept 2025 - Present

- Guiding and supporting first-year students, helping them integrate into university life.

Technologies

Programming Languages: JavaScript, TypeScript, PHP, SQL, Python, HTML, CSS, Dart, C++, C, Java

Frameworks and Tools: React, Tailwind CSS, Flutter, Laravel, Svelte, PostgreSQL, Git, Figma, Docker
