Profile

Informatics and Computing Engineering student at FEUP with a passion for software development, especially front-end. I enjoy creating intuitive and visually appealing user experiences while exploring new technologies and frameworks.

Education

University of Porto, BSc in Informatics and Computing Engineering Sept 2023 – Present

- **Coursework:** Software Engineering, Computer Architecture, Databases, Design of Algorithms, Web Technologies, Computer Graphics, Artificial Intelligence

Experience

Capgemini Engineering, Software Engineer Intern Feb 2026 – Present

- Developing a full-stack health monitoring platform that creates a digital twin of a patient's cardiac health, with wearable data ingestion, AI-powered anomaly detection, and live metric broadcasting to a clinical dashboard for remote medical supervision.
- Tools used: React, TypeScript, Flutter (mobile), Python, FastAPI, PostgreSQL, OpenAI API

FEUP, Software Engineering Teaching Assistant Feb 2026 – Present

- Helping Software Engineering students with questions about the subject theory and project.

NIAEFEUP, Member Oct 2025 – Present

- Collaborating on developing **uni**, a mobile application to help students discover and manage academic information in one place, and **TTS**, a platform where students can experiment with the possible combination of schedule options they can pick for the semester.

Projects

Artflow 🌐 artflow

- Co-developed a full-stack freelance platform centered around the art community, enabling artists to connect with clients and manage commissions.
- Tools used: HTML, CSS, JavaScript, PHP, SQLite

Focusly 🌐 focusly

- Collaborated on developing a productivity and study app featuring flashcards, quizzes, a Pomodoro timer, and a collaborative student forum.
- Tools used: Flutter, Firebase

Volunteering

Mentoria UP Sept 2025 - Present

- Guiding and supporting first-year students, helping them integrate into university life.

Technologies

Programming Languages: JavaScript, Typescript, PHP, SQL, Python, HTML, CSS, Dart, C++ , C, Java

Frameworks and Tools: React, Tailwind CSS, Flutter, Laravel, Svelte, PostgreSQL, Git, Figma, Docker
